The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/557,605	Applicant(s) BISCHOFF ET AL.	
	Examiner Thao T. Tran	Art Unit 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dong et al. (US 2002/0136862) in view of Liu et al. (2001/0007710).

Dong discloses a decorative laminate for flooring, comprising an overlay 102, a decorative layer 101, an underlay 103, and a substrate 106 (see Fig. 1; 0051). The decorative layer comprises a carrier film of a polymer and an ink layer or a print layer (see 0026, 0030). A paper-based decorative film is impregnated with melamine (see 0031).

The layers contain reinforcing materials that include microspheres of one or more thermoplastic polymers (see 0082). The underlayer may be made similar to the overlay layer (see 0054, 0057). Thus the underlay layer may also be impregnated with melamine; and the underlayer may also include a glass veil and a liquid coating film containing polyurethane (see 0049).

Dong fails to teach the thermoplastic polymer microspheres to be expandable.

Liu teaches expandable thermoplastic microspheres for use in a decor sheet (see abstract).

Therefore, it would have been obvious to one of ordinary skill in the art to have employed Liu's expandable thermoplastic microspheres in the decorative laminate of Dong, in order to increase abrasion resistance and decrease the wear of the press plates.
